

others I attended, and the patient most
 sick died the 8th. of May, I stayed until
 the 12th as there was no known cause for
 going on & did not pay board after the
 patient died. I charged nothing for
 any work I did after any of the teachers
 as I considered that my work as I did
 not feel I was engaged in private practice
 as to who was to blame I suppose we were
 both in fault. Our Society will probably
 make necessary comment on if you feel
 we have done wrong.
