Mr. C. C. Evans, District Superintendent

Dear Sir I'm looking over my papers & find I have duplicates of Revlun & Kootah's perhaps those are the reports you are needing to make out your list of villages visited by me. I will send them & if so, very well.

At every visit to each village I give a talk in health to all the people, also I advise in every house if there is need of it, or encourage if the house is clean & in good shape; but I had not given the school children a special talk it had never been mentioned specially & I had thought the general talk rather the talk to all the people was what was wanted & sufficient. though perhaps a special talk for children would be understood better by them.

As to using a stereopticon & slides, the people are very fond of pictures & they would doubtless be strongly impressed by the views, some would be benefited by them no doubt, others I feel certain would take no stock in them, but good usually goes to

my paper fully B. M. Newman
