Number of houses having but one room 13 More than one room 4

Average inhabitants per house 5 Average per room 4

General sanitary condition of houses, with reference to ventilation good a window also an opening is in the top these allow good ventilation.

Cleanliness The houses are generally clean as one could expect

Disposal of garbage buckets or cans are used to put garbage into and the garbage is carried away.

Water supply in the summer water is gotten from a well in the winter from the river also ice and snow are melted for water & they go up the river and get fresh water

General sanitary condition of village good garbage and refuse is carried far enough away so no ill effect is noticed.

Months in year in which natives reside in village eight months, most of the natives live in tents in the summer while here part of the other four months the natives are away hunting seal.

Number of treatments given free 6 paid 7

Remarks: Beside the above number of free treatments in Sept.,
was the pneumonia case which was near by and I ran
in and out frequently the 8 days he was sick. he was
an old gentleman and left a widow.

I have received \$750. for medicine and calls.
