

Nome, Alaska. June 10, 1914

Mr. W. T. Lopp,  
Chief of the Alaska Division,  
Seattle, Wash.

Dear Sir :

I enclose herewith letters from Mrs. Nichols regarding her work at Kotzebue. I wish to draw attention to the following matters contained in these letters and make these recommendations.

An organ should be sent in this summer. One of the small folding ones will do.

If there should happen to be a medical fund I hope that we can get it soon enough to use some of it at Kotzebue.

In any event there will have to be a good supply of coal for use of both school and hospital. Wood is very hard to get unless you make a special effort in the summer time and have the funds to pay for the work then.

I have recently seen an advertisement of a Kodiopticon, a magic lantern that handles slides made of film and not glass. However, this necessitates a water-cooled lantern, and it uses electric light. If one could combine in some way the use of film slides with acetylene light it would be a fine thing. I hope you can find something along this line.

Very truly yours,

S
