A small amount of building supplies have been sent to you for use in paying for native labor on the house. In using these supplies you will bear in mind the usual regulations regarding keeping a time sheet in triplicate, receipts showing supplies received by each native or person employed, and the final report showing the disposition of the supplies and the amount of labor performed.

The building materials will be shipped with the other supplies for the Shungnak station but the vouchers and Bills of Lading should show these supplies distinct from the supplies received from Seattle.

Very truly yours,

Supt.
